real beauty resides in imperfection

In a digital era, we sometimes feel the need to interact with something more human that will make us appreciate both the beauty and the imperfection of something made by hand.

expressiveness is... the new black

This series of illustrations paradoxically combines absurdity and a deep sense of childishness and naivety.

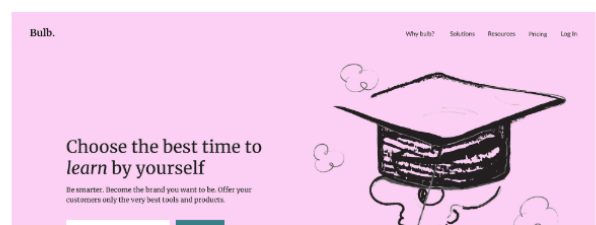

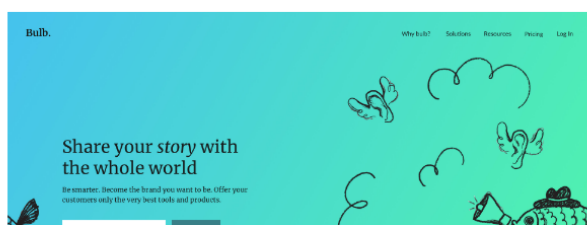

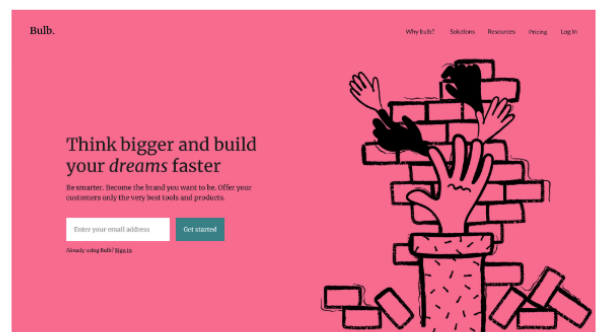

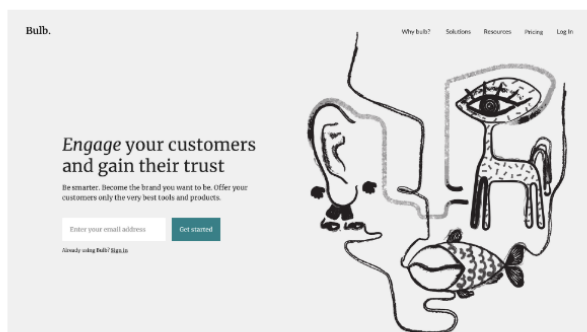

illustrations for applications

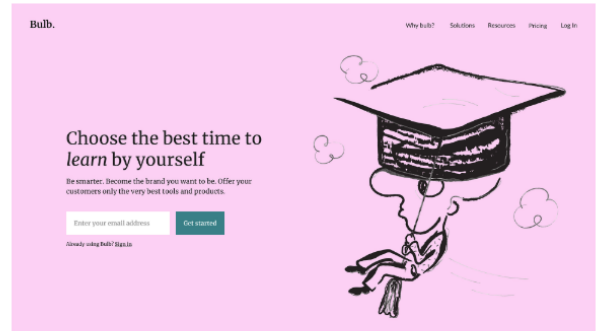

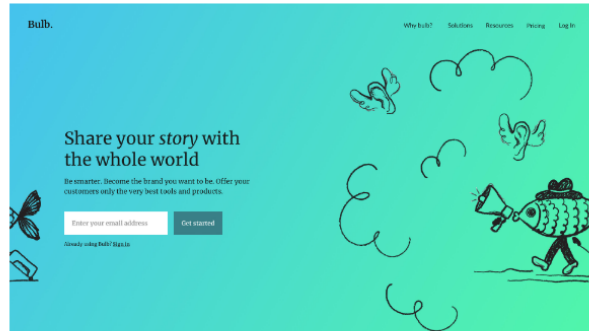

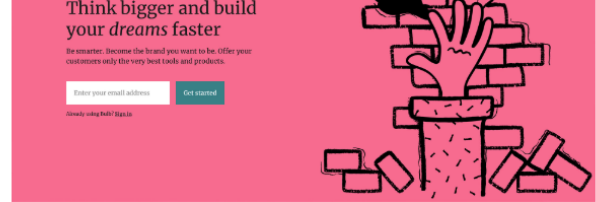

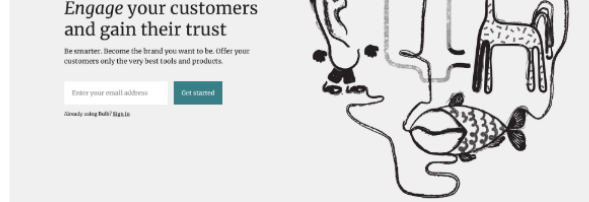

Welcome to my space for experiments! Look at this like a journey we can take together every step of the way, beginning another chapter with each new phase of the project development. And who knows where it will take us?

examples of use

Each illustration offers the possibility of limitless interpretations and uses and everyone can give it its own meaning. It depends only on each one's creativity and free spirit.

download illustrations

You're free to use these illustrations for both personal and commercial projects. And if you want to make a human happy would be nice to give credits by mentioning this website or be my supporter. I have created a membership plan for people who love my works and wish to support me and receive new artwork regularly.
